

GALI INTERNACIONAL, S.A. has the mission to serve the Society through its clients, either national and international. **GALI INTERNACIONAL, S.A.** considers the ensemble of actors of the process of conception and realization of his products (suppliers, employees, organisms and services), direct as well as indirect ones, as part of its organization to assure reliable and competitive products and services for our clients.

GALI INTERNACIONAL, S.A. sets as a priority the following points:

- To increase the quality of our products and services as a competitive & strategic advantage in front of alternative products and services, giving priority to our client's satisfaction as well as the other interested parties.
- To constantly innovate our products, processes and services as a differential factor in front of our competitors.
- To Consolidate our presence in the international market as a supplier of our products.
- To Collaborate with independent & recognized organisms in the homologation and certification of our products and processes.
- To constantly supply formation to our employees as an indispensable way to increase our competitiveness.
- To optimize our processes costs to increase our rentability and effectiveness.
- To minimize work risks and improve ambiance to reach a good labor environment.
- To minimize our processes impact to the environment, to prevent pollution.
- To analyze in a continuous manner our processes and management system with quantifiable indicators, applying tools and concepts based on the continuous improvement.
- To set internal objectives compatible with the context and the organizational strategy.

All of it applied to the products that GALI INTERNACIONAL, S.A. produces and distributes:

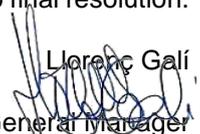

- Components for Gas and Diesel combustion engines, especially air and hydraulic starters , Inlet Shut Off valves and Turning devices.
- Air compressor sets and hydraulic stations.
- ATEX-IECEX components and conversions, either Ex products (alternators, starters and enclosures) or Ex conversions (industrial vehicles and Diesel Engines).
- Textile Machinery, specially screen printing tables and carriages.

Then, the quality system of Gali Internacional, SA aims to stablish the basis to satisfy the needs and improve the situation of our clients, as well as assure the quality of our products and services and to comply with the legal requirements and standard that apply.

QUALITY POLICY

The Quality system has been developed under my direction and has my total support; although the coordination and execution of the needed actions to the quality management is delegated to its responsible, I have and assume the ultimate responsibility to obtain it, so that I guarantee the human, technical and economical resources needed to reach them.

Any problem or difference not solved by this Manual, has to be submitted to this direction to final resolution.

Llorenç Galí
General Manager
