GALÍ maintains a Management System with the firm commitment to continuously improve, promoting the integrity of people and stakeholders, ensuring compliance with legislation, agreements and regulations, including environmental ones, managing the quality of our products:

- Accessories for Diesel and Gas Engines: Pneumatic and Hydraulic Starters, Shut Off Valves and Turning Devices.
- Air Starting Systems including Compressor Sets and Hydraulic Stations.
- Ex Products
- Ex Transformations
- Textile Printing Machinery.

For this, we define as priority:

- To increase the quality of our products and services as a strategic advantage, giving priority to the satisfaction of our customers and other stakeholders.
- Constantly innovate in products, processes and services as a differential factor against our competitors, using the best technology available and economically feasible.
- Enhance our international presence.
- Collaborate with independent and recognized bodies in the homologation and certification of our products and processes.
- To promote the continuous training as indispensable for our efficiency.
- Optimize the costs derived from each of our processes to increase our profitability.
- Minimize labor risks and improve work environment, maintaining a good work ambient.
- Protect the environment, including pollution prevention, and minimize the impact on climate change of our activities and products.
- Analyze our processes and management system continuously, with reference to objectives and indicators and applying concepts and tools based on improvement and risk management.

The Management System has been developed under the supervision of the Management and has its full support, assuming its responsibility and guaranteeing the necessary human, technical and economic resources.

The main reference for the system is the application of ISO 9001 and ISO 14001

This policy is available to all stakeholders and is communicated internally.
